
Find My Tutor

```
// Frontend - React development
cd /Users/chengzhifan/Documents/1\ Study/3\ UBC/CPSC\ 455\ Applied\
Industry\ Practices/Assignments/CPSC455_Assignments/
npx create-react-app assignment3
cd assignment3
npm start
```

```
// Frontend - React production
sudo npm install -g serve
npm run build
serve -s build -p 3000
```

```
// Backend - Express
cd /Users/chengzhifan/Documents/1\ Study/3\ UBC/CPSC\ 455\ Applied\
Industry\ Practices/Assignments/CPSC455_Assignments/assignment3/
sudo npm install express-generator -g
express backend_express
cd backend_express
npm install
Go to www file, and change port 3000 to 5000
DEBUG=backend_express:* npm start
npm install --save cors, and then import it in app.js file: var cors =
require('cors'); app.use(cors());
```

```
// Database - MongoDB
brew tap mongodb/brew
brew install mongodb-community@4.4
brew services start mongodb-community@4.4
brew services stop mongodb-community@4.4
npm install mongodb
npm install mongoose
```

```
// JSON Server
npm install json-server
json-server --watch json_server/db.json --port 9000 (npm run server)
```
